

TECHNICAL NOTICE

September 19, 2011

HUBER ENGINEERED WOODS ZIP SYSTEM™ ROOF SHEATHING*

TAMKO Building Products, Inc. ("TAMKO") will warrant its fiberglass/asphalt shingles and Lamarite® composite shingles when properly installed over Huber Engineered Woods ZIP System™ Roof Sheathing (as configured and manufactured as of the date of this notice), except any version of the ZIP System Roof Sheathing that incorporates a radiant barrier. TAMKO will warrant its MetalWorks® steel shingles when properly installed over Huber Engineered Woods ZIP System Roof Sheathing (as configured and manufactured as of the date of this notice), including the version of the ZIP System Roof Sheathing that incorporates a radiant barrier. The sheathing must be applied in accordance with the requirements of Huber Engineered Woods.

Compliance with building code requirements is the responsibility of the building owner, roof system design professional, and contractor. Huber Engineered Woods ICC-ES Report ESR-1473 provides fire classification requirements for installation of asphalt shingles and nonclassified roof coverings directly over ZIP System Roof Sheathing. In addition to the requirements in ESR-1473, Underwriters Laboratories fire classification requirements for the specific TAMKO roof covering must be considered. These requirements can be located by searching the certifications directory at ul.com or by contacting TAMKO.

TAMKO shall not be responsible for deficiencies or movement in the roof deck and/or improper application of the roof sheathing. This document is not intended nor should it be construed to modify or alter the terms of TAMKO's Fiberglass/Asphalt Shingles Limited Warranty, TAMKO's Lamarite Slate Composite Shingle 50-Year Limited Warranty, TAMKO's Lamarite Shake Composite Shingles 50-Year Limited Warranty, or TAMKO's MetalWorks Steel Shingles 50-Year Limited Warranty.

Additional information about TAMKO products is available at tamko.com.
